

T-MAX™

The first choice for interior plasters and decorative materials

www.graco.be

PROFESSIONAL ADVANTAGES

- A very smooth finish:
A lot less laying off, up to 30% savings possible compared to manual work
- Up to 30 meter hose possible:
Spray a complete villa without moving your sprayer or material.
- Spray airless or air-assisted:
Applies almost all plasters without a compressor.
Spray decorative materials using an external compressor

T-MAX™

The first choice for interior plasters and decorative materials

The T-Max™ is a real solution for applying plasters, rather than just a spraying machine.

1 person handling

We designed this new sprayer, so that one person can use it: easy to handle, use and clean.

Professional finish

You'll be amazed by the high quality finish of the sprayed material, reducing scraping of the material to a minimum.

Comfort and efficiency

Not only that, the T-Max™ makes your work more comfortable and generates time savings up to 30% compared to the conventional application methods.

Using this innovative sprayer, you'll soon notice that this strong performer not only supports one person, but can easily support a team of 3 people, applying more than 500m² a day.

One-button control

Simple to operate: put the material in the hopper and choose Air-Assisted (green) or Airless mode (blue). Open your lance and off you go.

Hose

Extremely light and flexible. To tackle bigger jobs: the quick connecting camlock™ system allows you to safely extend hose length up to 30 meters by hand, without using extra tools. Allows complete spraying of a villa with two floors without moving your T-Max™.

Motor

Runs smoothly and only when material is needed. Thanks to the modular design, you can manually disconnect the motor, making it easier to carry for maintenance, or to stow away safely if not in use.

Handles

Mount the handle on the back to move around, or on the front to move like a wheelbarrow: great for climbing stairs!

Mixer mounting kit (optional)

Fix your personal mixer on the T-Max™; adapt the angle for optimal mixing without damaging the hopper. 2 sided mounting options. For interior and exterior mixing.

Hopper

Extra light and with cover, the polymer hopper does not rust. The round shape optimises material suction and is the best design for fast and complete mixing.

Hose hook

The hose hook ensures that your material hose always stays aligned with your sprayer. This makes it easier to get through narrow spaces.

The lance

Quick and clean, opening/closing avoids spitting. The horizontal design generates optimal material passing, avoiding material clogs. Very light and extremely easy to handle.

GOOD TO KNOW

Optimal cleaning design

Our designer team has made sure that daily cleaning is effortless. After rinsing with water, flush the hopper with the large plug. The hopper can easily be disassembled. No need to explain the advantages. The cleaning balls are part of the T-MAX™ packages. Use these to clean your hoses. The special shaped T-MAX™ scraper helps you remove the remaining pieces of dry material. Last but not least: a special tool is delivered to clean the inside of the material filter.

Airless advantages

The very restricted spray fan is typical of airless spraying. This allows you to spray very closely around all obstacles such as windows, doors and other fixed decorations. Simply by moving forwards or backwards from the surface, decide yourself on the width of the spray fan. Close up means a small fan, further away means a wider spray pattern. You will not only need less taping, but also less laying off around all kind of objects on the wall.

TIP!

Mount the Fine Finish Kit at the end of the lance whilst spraying air-assisted.

A round spray pattern is typical when spraying decorative material with a compressor and an air nozzle: it's difficult to control and not easy to get an even finish. Experience the difference with Graco's Fine Finish kit. This kit transforms the round spray pattern into a controlled spray fan. Spray decorative materials with airless.

www.graco.be

Materials & Applications

The T-MAX™ has been specifically designed to apply most interior plasters and fillers. Using the T-MAX™ in combination with an external compressor, decorative plasters with particles up to 1.5 mm can be sprayed also. The T-MAX™ has been tested and approved to spray the most demanding plasters, mixed or premixed, that are currently on the market.

SmartControl™

The SmartControl™, the electronic brain of the T-MAX™, adjusts the motor to maintain an even spray pattern, which guarantees a constant finish. Browsing through the menu, the display shows interesting information such as pressure, material usage and error codes (self-diagnosis).

T-MAX™ Accessories

Get the most out of your equipment, using our professional accessories

Improve your finishing quality

Guns

Depending on the size of the job or the kind of material you apply, you might want to choose more comfort rather than performance.

256383 Lance with filter 30 mesh, HDA651 RAC X™ tip and RAC X™ tip guard

Filters

Using filters prevents dirt entering the spraying system. They minimize possible tip clogs and optimise the quality of your finish.

289922 Texture filter 18 mesh, with scraper
289923 Texture filter 30 mesh, with scraper
15U047 Material strainer hopper

Tips & Guards

ABOUT GRACO

Founded in 1926, Graco is a world leader in fluid handling systems and components. Graco products move, measure, control, dispense and apply a wide range of fluids and viscous materials used in vehicle lubrication, commercial and industrial settings.

The company's success is based on its unwavering commitment to technical excellence, world-class manufacturing and unparalleled customer service. Working closely with qualified distributors, Graco offers systems, products and technology that set the quality standard in a wide range of fluid handling solutions. Graco provides equipment for spray finishing, protective coating, paint circulation, lubrication, and dispensing sealants and adhesives, along with power application equipment for the contractor industry. Graco's ongoing investment in fluid management and control will continue to provide innovative solutions to a diverse global market.

ABOUT AEMCO

AEMCO was established in 2007 as an organization focused to increase professionalism and productivity in the arena of coating and surface preparation across the Kingdom of Saudi Arabia. Latest trends and technologies in coating industry were made available from AEMCO to our professional end users to achieve quality results and satisfaction. We started our operations in Riyadh and expanded to Central, Eastern, Western and Northern Region of the Kingdom.

نبذة عن الشركة:

تأسست شركة إيمكو في عام ٢٠٠٧ لتكون شركة تركز على زيادة الاحترافية والإنتاجية في ميدان الطلاء وتجهيز الأسطح للدهان في المملكة العربية السعودية. وفرت شركة إيمكو أحدث أساليب التقنية في مجال تنفيذ الطلاء لعملائنا المحترفين في صناعة تنفيذ الطلاء للوصول الى نتائج مبهرة ومرضية. بدأنا عملياتنا في الرياض وتطورت لتصل الى المنطقة الوسطى، المنطقة الشرقية، المنطقة الغربية والمنطقة الشمالية من المملكة العربية السعودية.
