

FRP Systems

Proportioners and Guns for Gel Coat and Chop Applications

Industry-leading solutions for FRP

Raising the bar for high-performance FRP equipment

Engineered with industry-proven Graco components, Graco FRP (Fiber-Reinforced Plastic) Systems and RS^{TM} (Resin Spray) applicator guns provide you with a system that is technologically advanced, durable and easy to use.

Lower cost of ownership

- Easy maintenance few wear parts
- More uptime for production—longer periods between scheduled maintenance

Quality parts—all day, every day

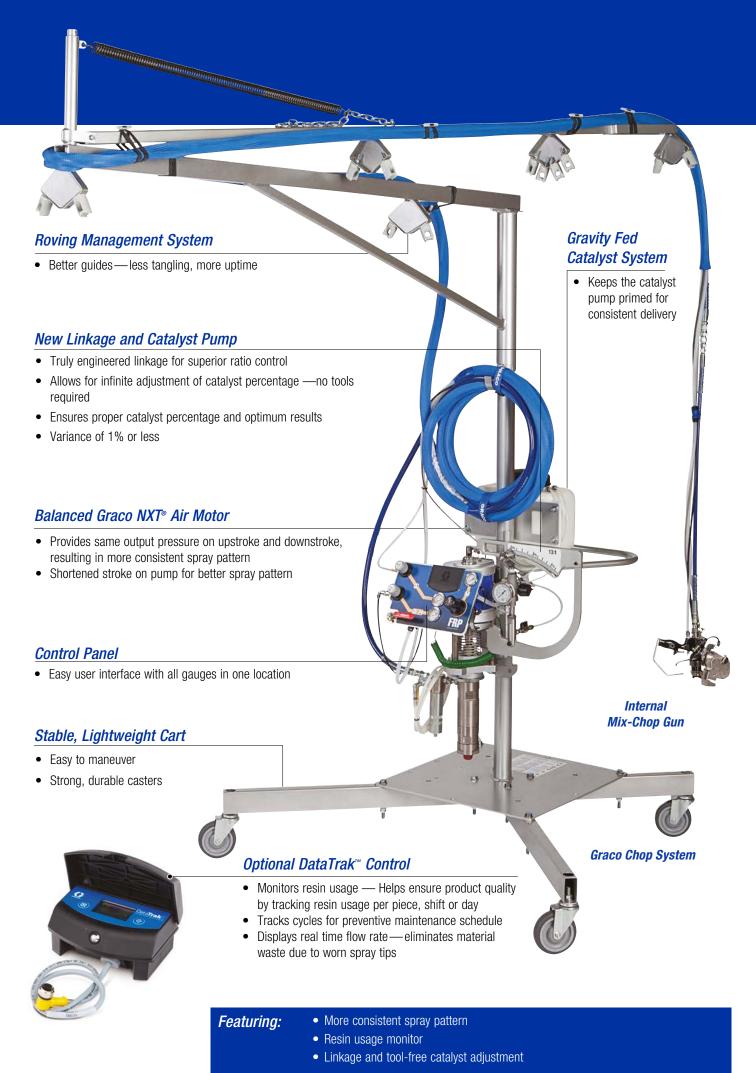

Your reputation rides on the quality of your end products. With Graco FRP equipment, you're assured of a consistent catalyst ratio for a consistent cure—resulting in higher quality, finished products.

A smart future investment: MACT-compliant technology

Graco FRP equipment features MACT (Maximum Achievable Control Technologies)-compliant RS spray guns. As regulations change to require new technologies, Graco promises to be a smart investment for the future of your business.

Here's why. Graco FRP equipment supports MACT requirements with two application tip designs—one for air assisted airless and a second one for impingement spray processes. With Graco, you can switch from air assisted airless to impingement by simply changing the spray tip.

Easy to use, lightweight guns

Graco RS Chop Gun with Cutter

Magnetic Cutter Drum

Quick and easy blade changes

 Magnet in cutter head holds blades in place

(Where the fluid line connects to the gun)

- Allows smooth movement
- Operator can easily pivot in different directions without kinking the hose

Ergonomic Handle

· Less operator fatigue

Graco RS Gel Coat Gun

Solvent-Safe

 Easy shutdown simply place front end in solvent at end of shift

Quick-Disconnect Front End

- Modular design means it's very easy to get to the specific part you need to replace
- No need to disassemble the entire gun
- Increases productivity, reduces cleanup time

Constant Control

- Adjust glass cutting tension output on the production floor in seconds
- No tools needed to make many adjustments

Lightweight, High-Output Cutter

- Allows you to get the glass output you need with fewer strands of roving
- Fewer strands of roving means less chance of tangling, easier handling and more uptime
- External anvil adjustment lets you quickly and easily adjust anvil tension

Quick-Change Blade Assembly

- No tools required easy to change blades in seconds
- Ability to quickly swap preloaded cutter assembly on the production line resulting in more uptime
- Magnetic cutter assembly snaps and holds blades in place during change out to reduce nicks and cuts
- Only available at Graco!

Both Graco RS Gel Coat Guns and Graco RS Chop Guns are available in internal and external mix models

Fast switch tip design – A Graco Exclusive

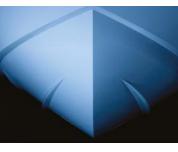

Exclusive Graco Feature

Today's FRP market uses two different technologies. Mechanical Air Atomized (Air Assisted Airless) and Mechanical Non-Air Atomized (Impingement). Using the Graco RS Guns allows you to switch from one technology to the other by simply changing the spray tip. This can be done quickly and cost effectively. Competitive models require time-consuming spray gun head changes and or complete replacement of the spray gun which results in lost time and higher cost conversion.

AAC Spray Control Technology – A Graco Exclusive

Air Assist Containment™ (AAC) – control and contain your spray pattern

When you buy a drum of resin or gelcoat, you pay for every drop of material. Graco will help you put as many of those drops as possible on the mold.

Our exclusive Air-Assist Containment (AAC) wraps the spray pattern in a containment shield of air. This prevents atomized droplets from escaping the spray pattern creating a better working environment. Droplets that escape and end up on the floor, wall or employee's clothing are a waste of money.

AAC creates a spray pattern where the droplets travel to the mold at very low pressure. The low speed or "particle velocity" creates very little turbulence or disturbance in the material when it is applied to the mold. Higher "particle velocity" creates a great deal of turbulence during the application process. Turbulence, or over-atomization, creates air entrapment which can result in porosity issues.

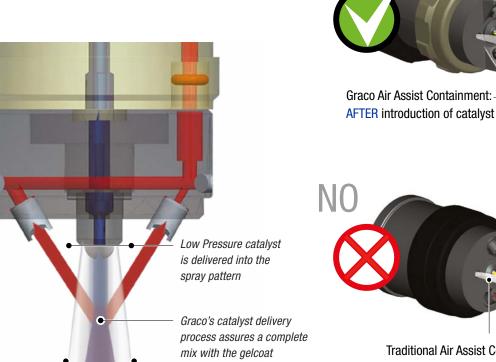

Resin

Catalyst

Graco Spray Technology

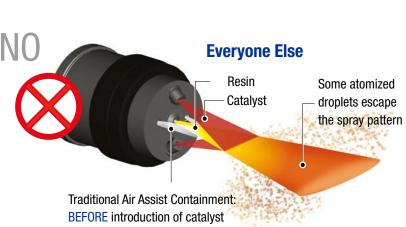

Atomized droplets are kept or "contained" in

the spray pattern

The patented AAC is introduced to the spray pattern after the catalyst assuring a complete mix, reducing over spray and providing the highest transter

efficiency.

HOW TO READ A COMPOSITE SPRAY TIP NUMBER

Airless Composites Spray Tips - For example: CST521

- 1. The first three letters (CST) = Composite Spray Tip.
- 2. The 4th digit indicates pattern width code. Double this number to get the pattern width at 3mm (12 inches) distance. In this case, 5 equals a 250mm (10 inches) spray pattern width at a 2 inches spraying distance.
- 3. The last two digits indicates orifice size. In this case, 21 is equivalent to a .021" diameter orifice.

Impingement Composite Spray Tips - For example: CSTS75

- 1. The first three letters (CST) = Composite Spray Tip.
- 2. The 4th digit indicates S for stainless steel or T for tool steel.
- 3. The 5th digit indicates spray pattern width code. Double the number to get pattern width at 450mm (18 inches) distance.

In this case, 7 equals a 350mm (14 inches) pattern width at an 450mm (18 inches) spraying distance.

Heavy Duty Drum Agitator

- Heavy duty gearbox mixes high viscosity materials
- Leak-free and oil-less gearbox prevents material contamination
- Stainless steel agitator and cover for corrosion resistance
- Twin paddles thoroughly mix finishing materials
- Siphon option allows material transfer through agitator shaft
- Access port for easy sampling and inspection of material during operation

Part No.	Descripiton	Drive	KW (HP)	Length cm (in)	Material	Manual
231414	Heavy-duty back-geared agitator with elevator, drum cover and siphon kit	Air	0.37 (0.5)	81.25 (32)	SST	<u>308609</u>
231413	Same as 231414, except without siphon capability	Air	0.37 (0.5)	81.25 (32)	SST	<u>308609</u>

FRP Accessories

In-line Air Filter and Coalescers

- Reusable filter removes particles down to 5 microns
- Coalescer removes contaminants down to 0.01 microns
- Auto-drain eliminates manual emptying of filters
- Built-in filters change indicator signals replacement to ensure optimal efficiency

Part No.	Description	Air Inlet in	Air Outlet in	Air Flow Capacity	Maximum Inlet Pressure
234405	Air filter/coalescer assembly (both with auto drain)	1/2 f (npt)	1/2 f (npt)	70 CFM	12 bar (1.2 MPa,175 psi)
234406	Stage 1 - Air filter with auto drain removes contaminants to 5 microns.	1/2 f (npt)	1/2 f (npt)	108 CFM	12 bar (1.2 MPa,175 psi)
234407	Stage 2 - Coalescer with auto drain removes particles to 0.01 microns.	1/2 f (npt)	1/2 f (npt)	70 CFM	12 bar (1.2 MPa,175 psi)
234408	Air filter with auto drain removes contaminants to 5 microns	3/4 f (npt)	3/4 f (npt)	300 CFM	12 bar (1.2 MPa,175 psi)
234409	Coalescer with auto drain removes particles to 0.01 microns	3/4 f (npt)	3/4 f (npt)	115 CFM	12 bar (1.2 MPa,175 psi)

Instruction Manual: 309919

Fluid Heater Kit

- Variable heating levels for consistent viscosity control
- Approved for hazardous locations
- 500 bar (7250 psi) maximum working pressure
- Stainless steel construction is compatible with polyester resins and coats

Part No.	Description
16N018	Viscon HP Heater Kit – 120V
16N019	Viscon HP Heater Kit – 240V
16N016	Viscon HP Hazardous Location Heater Kit – 120V
16N017	Viscon HP Hazardous Location Heater Kit – 240V
16N119	Heater Mount Kit

ABOUT GRACO

Founded in 1926, Graco is a world leader in fluid handling systems and components. Graco products move, measure, control, dispense and apply a wide range of fluids and viscous materials used in vehicle lubrication, commercial and industrial settings.

The company's success is based on its unwavering commitment to technical excellence, world-class manufacturing and unparalleled customer service. Working closely with qualified distributors, Graco offers systems, products and technology that set the quality standard in a wide range of fluid handling solutions. Graco provides equipment for spray finishing, protective coating, paint circulation, lubrication, and dispensing sealants and adhesives, along with power application equipment for the contractor industry. Graco's ongoing investment in fluid management and control will continue to provide innovative solutions to a diverse global market.

ABOUT AEMCO

AEMCO was established in 2007 as an organization focused to increase professionalism and productivity in the arena of coating and surface preparation across the Kingdom of Saudi Arabia. Latest trends and technologies in coating industry were made available from AEMCO to our professional end users to achieve quality results and satisfaction. We started our operations in Riyadh and expanded to Central, Eastern, Western and Northern Region of the Kingdom.

تأسست شركة إيمكو في عام ٢٠٠٧ لتكون شركة تركز على زيادة الاحترافية والإنتاجية في ميدان الطلاء وتجهيز الأسطح للدهان في المملكة العربية السعودية. وفرت شركة إيمكو أحدث أساليب التقنية في مجال تنفيذ الطلاء للعلاء للوصول الى نتائج مبهرة ومرضية. بدأنا عملياتنا في الرياض وتطورت لتصل الى المنطقة الوسطى، المنطقة الشرقية، المنطقة الغربية والمنطقة الشمالية من المملكة العربية السعودية.
