XP[™] and XM Series SprayersPlural component sprayers for

industrial coatings applications

Industrial coatings applications

Discover the benefits of Graco's XP and XM line of sprayers when you switch from hand-mixing to a plural component machine.

Reduce waste and material costs

With the Graco XP and XM sprayers, you reduce waste and save money because you only mix as much material as you need. No more throwing away unused material at the end of the day. No more residue left over in smaller pails or cans. You can buy material in bulk as well.

Less clean-up saves time and money

Only the parts that come in contact with mixed material must be cleaned during the job. Instead of flushing out an entire pump system that contains mixed material, you only need to flush the static mix tube and hose to the gun. Reduced cleaning time means you save labour costs and increase uptime.

Provides consistent material quality

No more guesswork or human error in measuring means you can improve throughput, cut back on material waste, and reduce rework. Materials are proportioned by precision positive displacement pumps and mixed accurately and on-ratio at the mix manifold.

Easy and affordable

Easy and affordable two component spraying.

Whether you are spraying a high-solids polyurethane or a 100% solids epoxy, Graco helps you get the job done with a complete line-up of XP plural-component sprayers. To learn more about our XP sprayers or to request a custom solution, visit **graco.com/xp.**

Which system is right for you?

► The XP line of sprayers is uniquely set-up to improve the way you spray and mix protective coatings materials.

Easy to operate

Easy to operate for a much quicker start-up.

With proper training, operators are up and running quickly. The Graco XP runs right out of the box with a fast set-up time.

PressureTrak[™]

- Monitors A and B differential pressure
- · Provides ratio assurance
- · Optional accessory included with selected models

Outlet manifold and valves

- Fluid pressure gauges for monitoring pump output
- · Provides automatic overpressure relief
- Includes circulation back to the supply for pump priming, purging, or for relieving outlet pressure
- Allows fluid warm-up circulation when optional heaters are used

Mix manifold

- Provides simple fluid control for mixing or flushing
- Accurately dispenses A and B fluids to the static mix tube
- Handles high-solids coatings with large ports and a low pressure drop
- Choose to use the mix manifold remotely to reduce solvent and material waste

Xtreme® Pump lowers

- The standard severe duty[®] coating on rods and cylinder maximises wear life
- Quick knockdown design and throat seal cartridges provide fast and easy maintenance
- Multiple sizes available to provide various fixed mix ratios
- Easily change one or both lowers to get the desired mix ratio

Save on maintenance costs

Reduce maintenance costs with two pumps instead of three.

Engineered to proportion with two pumps instead of three, the Graco XP reduces your cost of ownership with fewer components.

Optional electrically heated hose controller

- Visual indicator of the hose control temperature
- Standard option on selected XP and XM units

Electrical junction box

- Power distribution to each heat zone
- Two spare zones for flexibility
- Less hassle and a faster setup time

Viscon® HP primary heaters

- Reduces coating viscosity and improves the spray pattern
- 4000W

XL air motor

- Easier maintenance
- Isolated poppet valves for reduced icing potential
- · Less pulsation

Material hoppers

- Side-mounted 26 litre hoppers hold A and B components
- Made of rugged polyethylene unaffected by harsh solvents
- Optimised for direct pump feed

Heating-fluid circulation kit and Viscon HP heater

- Efficiently heats the Xtreme-Wrap water-heated hose and remote manifold (heated hose sold separately)
- · Quick disconnects; brass fittings for water lines
- Durable with fast heat up times

More flow capacity

More flow capacity to get jobs done faster.

The Graco XP-hf is designed with more flow capacity making it ideal for high output applications such as railcars, tank linings, marine coatings and much more. This system combines the popular XP sprayers with the powerful XL^{∞} 10000 air motor, giving you more flow, so you can get jobs done faster with less wear and tear.

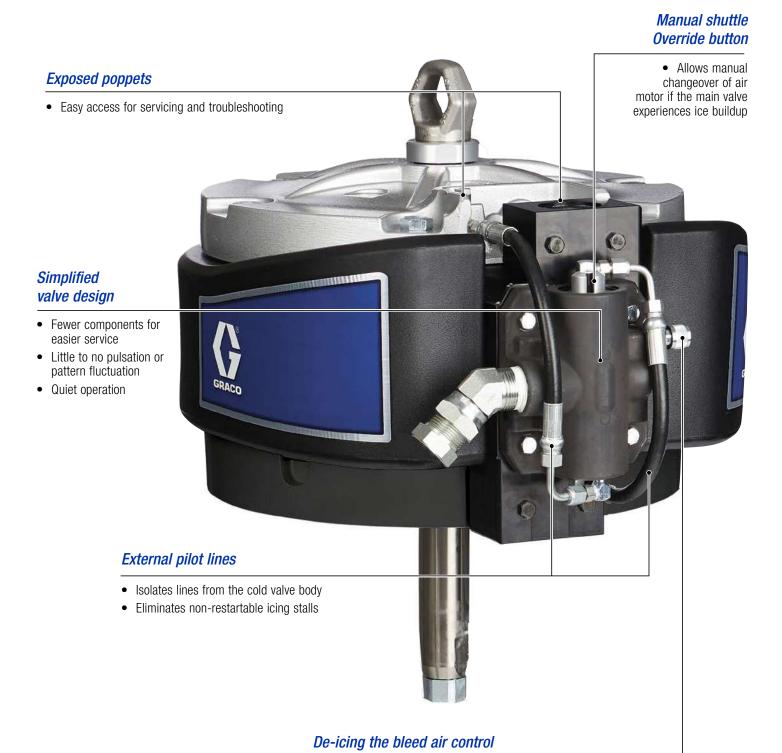

Increased productivity

Increased productivity and labour savings.

With the powerful XL 10000 air motor, get 60% more flow than with XP sprayers*. This also gives your crew the ability to use larger tips or run multiple guns, getting jobs done faster.

*Running at the same cycle rate.

 Maintains performance during heavy icing conditions

Easier to service

Easy to service and operate

The Xtreme® metering pumps with quick knock-down make it easy to do service work; a built-in fluid filter and the spring loaded lower ball checks for a crisp changeover. The mechanically operated design makes it easier to understand.

PressureTrak

Monitors the A and B differential pressure

• Provides ratio assurance

XL10000 air motor

 The high output, high efficiency 10000 cc air motor lets you use multiple guns with almost no perceivable pulsation

Material hoppers

- Side-mounted 26 litre
 (7 gal) hoppers hold A and B components until it is time to spray
- Optimised for direct pump feed

 A portable cart with tow handle which fits through a standard 915 mm doorway

Improved spray pattern

Improved spray pattern with more control.

The Viscon HF fluid heater improves the spray pattern with more control. Viscon HF heaters (5400W) are three times less restrictive than Viscon HP with a removable, cleanable aluminum core — making it ideal for high demand applications.

Optional electrically heated hose controller Visual indicator of the hose control temperature Standard option on selected XP and XM units Merkur[®] Solvent flush pump Quickly flushes mixed materials from the hose and gun Heating-fluid circulation kit and Viscon HP heater Efficiently heats the Xtreme-Wrap water-heated hose and remote manifold (heated hose sold separately)

Electrical junction box

- · Power distribution to each heat zone
 - Two spare zones for flexibility
- Less hassle and a faster setup time

Viscon HF primary heaters

- Reduces the coating viscosity and improves the spray pattern
 - Three times more flow than from the Viscon HP to maximize production
 - 5400W

- · Quick disconnects; brass fittings for water lines
- Durable with fast heat up times

Complete skid solution

Complete skid solution for your highest demand applications.

The Graco XPs-hf skid-based system is an all-in-one solution that combines the XP-hf sprayer with improved material conditioning. The XPs-hf helps reduce waste, speed up cure times and improve the mix ratio. With durable, agitated heated tanks, your coatings will obtain the best conditioning to meet the highest demand applications — making you more productive.

Complete skid solution

High demand projects often require large spray tips or multiple guns. This complete solution will keep up with your operation, so your crew can focus on applying the coatings.

5:1 Monark® feed pump

- Tank length designed for convenience
- · Feed lines with a wye strainer
- Feeds high viscosity coatings

Pre-wired junction box

- One electrical input for all heating components
- Meets global electrical standards

Optional electrically heated hose controller

- Visual indicator of the hose control temperature
- Standard option on selected XP and XM units

Xtreme-Duty™ agitator

- Back-geared with widepaddled blades
- Mixes high viscosity coatings

Viscon HF primary heaters

Reduces the coating viscosity and improves the spray pattern

- Three times more flow than from the Viscon HP to maximize production
 - 5400W

Optional heating-fluid circulation kit and Viscon HP heater

- Efficiently heats the Xtreme-Wrap water-heated hose and remote manifold (heated hose sold separately)
 - Quick disconnects; brass fittings for water lines
 - Durable with fast heat up times

95 L SST-lined heated tank

- Double-walled construction
- 3000W heaters
- Conditions high viscosity coatings

- Easy to maintain with a quick knockdown
- Two metering pumps instead of the three used on traditional designs
 - · Fewer repair parts

Xtreme® pump lowers

Hydraulic solution

Hydraulic systems are the choice of spraying professionals who want to reap the benefits of the latest spraying technologies and add productivity to boost their financial bottom line. The Graco XP-h is ideal when compressed air is limited or for truck, palletised, trailer or flatbed systems that have on-board hydraulic power. The XP-h is available as a cart, stand or wall-mount system.

Portable for remote placement

 Quick-disconnect hydraulic connections (Sold separately)

Viscount II motor

- Ice free
- · Energy efficient
- · Smooth changeovers

Viscon HP primary heaters

 Reduces the coating viscosity and improves the spray pattern

• 4000W

Mix manifold

- Provides simple fluid control for mixing or flushing
- Accurately dispenses A and B fluids to the static mix tube
- Choose to use the mix manifold remotely to reduce solvent and material waste

Xtreme® Pump lowers

- Quick knock-down
- Easy to maintain
- Two metering pumps instead of the three used on traditional designs

Outlet manifold and valves

- Fluid pressure gauges to monitor the pump output
 - Provides automatic overpressure relief
 - Includes circulation back to the supply for pump priming, purging and heating

On-ratio spraying

On-ratio spraying means peace of mind.

With an optional PressureTrak™ or XP pressure monitor kit you have the assurance that your Graco XP is spraying on-ratio. It monitors the spray pressures on the A and B sides and shuts down the sprayer if poor spraying conditions occur.

The benefits are:

- Better overall productivity projects are being finished on-time
 Confidence in the quality of your work
- Reduced labour and rework costs

Which XM is right for you?

The XM line of sprayers is uniquely set up to improve the way you spray and mix protective coatings materials.

Model	XM50	XM70
Mix ratio range	1:1 to 10:1 (in 0.1 increments)	1:1 to 10:1 (in 0.1 increments)
Minimum flow rate	0.95 lpm*	0.95 lpm*
Maximum flow rate	11.4 lpm*	11.4 lpm*
Maximum mixed fluid working pressure	358 bar (5200 psi, 35.8 MPa)	434 bar (6300 psi, 43.4 MPa)
Maximum pump air set pressure	7.0 bar (100 psi, 0.7 MPa)	6.2 bar (90 psi, 0.62 MPa)

^{*} Actual flow rates vary according to the material type

Accurate ratio contol

Accurate ratio control for quality assurance you can count on.

Graco XM plural-component sprayers are designed to spray the toughest plural-component materials, with the assurance that you are spraying accurately and on-ratio. Ideally suited for marine, bridge, rail and wind energy applications, each Graco XM is fully configurable – simply start with a base unit and select the additional components required for your application.

Intuitive user controls

- Adjustable ratio control, 1:1 to 10:1
- Provides real-time display of ratio for

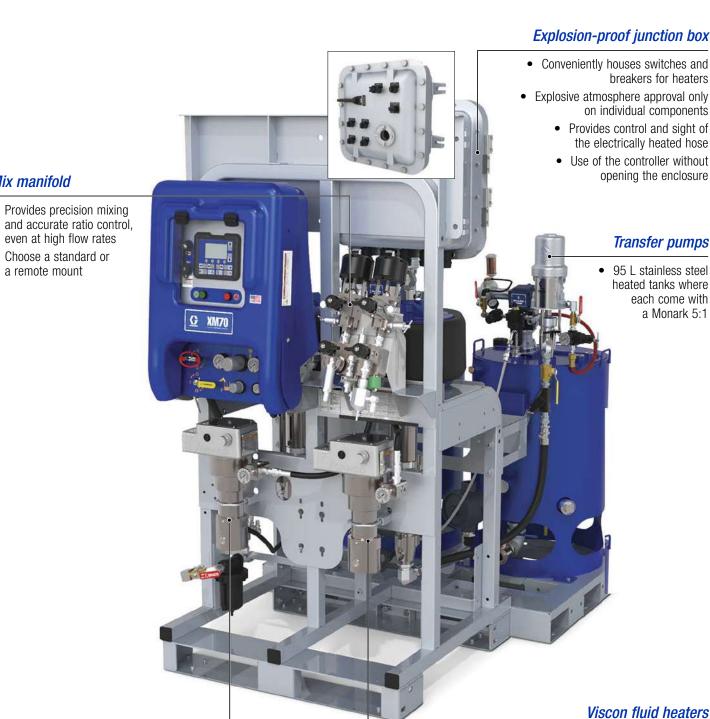

Choose 38 L stainless steel or 95 L stainless steel lined tanks (heated)

Flexible configurations

Flexible configurations to give you the options each application needs.

With Graco XM plural-component sprayers, you have the flexibility to select the essential equipment on your system to complete your jobs accurately and reliability. Whether your application requires a basic machine or one that is fully loaded, Graco XM sprayers provide the technology and performance you need to get the job done faster and more efficiently than ever before.

- Choose a standard model or a model approved for explosive atmospheres
 - Reduces the coating viscosity and improves the spray pattern
 - Viscon HP models, 4000W
- Viscon HF models, 5400W (three times more flow than with the Viscon HP)

Mix manifold

a remote mount

Easy-to-use controls

Easy to use controls to monitor and track critical data.

The user interface on the Graco XM is intuitive and simple to use. It provides two display modes: "Setup" for entering parameters and a basic "Run" mode for everyday operation. The user interface monitors and tracks the pressure, temperature and flow and allows you to program maintenance schedules as well. With a conveniently located USB port, you can easily access and download historical spraying data.

Precise mixing

Precise mixing and ratio assurance

Material mixing reaches a new level of precision due to Graco's dosing technology. With the Graco XM, the 'B' side material is injected at a high pressure into the 'A' side material. Advanced sensors allow pumps to compensate for pressure fluctuations, resulting in accurate, on-ratio mixing for a better yield and less waste. Choose a standard, frame-mounted mix manifold or remote mix manifold; both include a pressure gauge that displays the fluid output pressure.

Configurator

Hazardous location

Configure an XM plural component sprayer from this table when the application requires official top-level approval for use in hazardous locations.

XP and XM options and accessories

SST lined heated hoppers

- 95 L double-walled tank
- 3000W immersion heaters
- · Xtreme-Duty agitator
- 5:1 Monark feed pump
- Gravity or pressure feed
- Floor or caster mount

Polyethylene heated hoppers

- 76 L double-walled tank
- · Set up for gravity or pressure feed
- · Accepts both an agitator and a feed pump
- Jacketed for heated water/glycol or oil
- Tank heating using immersion heaters or Viscon[™] HP heated circulation

Merkur[®] solvent flush pump

- Quickly flushes mixed materials from the hose and gun
- Provides enough pressure to push good paint out of the mix hose with a spray pattern, resulting in less wasted material
- The prime valve can be used to supply flushing solvent for tip cleaning, or to flush a second hose and gun that have been removed from the tee in the mix line

Xtreme-Duty® drum agitator

- Designed specifically with protective coatings materials in mind
- Special blades are designed to keep high viscosity materials in suspension
- Better mixing and quality control of your high solids coatings

Xtreme pump lowers

- Easily change one or both lowers to get the desired mix ratio
- Specific Xtreme pump lowers with springloaded inlet valves, a 30 mesh filters and no prime valves
- Overpressure rupture protection included on the 36 cc, 48 cc, 54 cc, 58 cc and 72 cc sizes

Recirculation kits

- Recirculate material through a heated hose back to hoppers with ease
- No need to disconnect hoses from the manifold
- · Adapts to all XP and XM systems

Viscon® fluid heaters

- Reduces viscosity so paint can be sprayed at a lower pressure
- Provides for a consistent spray temperature, resulting in a consistent spray pattern and better thickness control
- Mounts easily to slotted holes (requires the heater mounting kit 262450)
- A standard or a hazardous atmosphere

26L plastic hopper

- Gravity feed with a recirculation port
- Blue for resin, green for a hardener
- Includes hardware to bolt onto cart

38L SST hopper

- Gravity feed with a recirculation port
- Flat surfaces cleaned with ease

Graco gun splitter

The Graco gun splitter lets you use two spray guns with one plural- component sprayer. In addition, you can independently clean and flush one gun, while the other gun remains in use. If you are using a higher production machine, the gun splitter helps you become even more productive

Remote mount mix manifold

- The mix manifold on the sprayer is removable and can be located closer to the spray gun to reduce the volume of mixed coatings and required flush solvent; this results in less wasted materials
- A and B hoses from the sprayer to the mix manifold do not need to be flushed and can be sized for less pressure loss over long distances
- The manifold is heated when using a water/glycol heated hose

Heated hoses

- If spraying short pot-life materials, it is recommended to place the mix manifold remotely and use a heated hose to maintain the material temperature at a desired distance from the machine
- Removable hook and loop scuff jacket making it easy to change hose diameters for different ratios

Water heated hose

- Four heavy-duty polyurethane water heating hoses light weight, flexible providing unmatched heat transfer
- Transportation grade brass water tube fittings a no-leak design

Electrically heated hose

 Available in 15m (50ft), 30m (100ft), 45m (150ft) and 60m (200ft continuous lengths

ABOUT GRACO

Founded in 1926, Graco is a world leader in fluid handling systems and components. Graco products move, measure, control, dispense and apply a wide range of fluids and viscous materials used in vehicle lubrication, commercial and industrial settings.

The company's success is based on its unwavering commitment to technical excellence, world-class manufacturing and unparalleled customer service. Working closely with qualified distributors, Graco offers systems, products and technology that set the quality standard in a wide range of fluid handling solutions. Graco provides equipment for spray finishing, protective coating, paint circulation, lubrication, and dispensing sealants and adhesives, along with power application equipment for the contractor industry. Graco's ongoing investment in fluid management and control will continue to provide innovative solutions to a diverse global market.

ABOUT AEMCO

AEMCO was established in 2007 as an organization focused to increase professionalism and productivity in the arena of coating and surface preparation across the Kingdom of Saudi Arabia. Latest trends and technologies in coating industry were made available from AEMCO to our professional end users to achieve quality results and satisfaction. We started our operations in Riyadh and expanded to Central, Eastern, Western and Northern Region of the Kingdom.

تأسست شركة إيمكو في عام ٢٠٠٧ لتكون شركة تركز على زيادة الاحترافية والإنتاجية في ميدان الطلاء وتجهيز الأسطح للدهان في المملكة العربية السعودية. وفرت شركة إيمكو أحدث أساليب التقنية في مجال تنفيذ الطلاء لعملائنا المحترفين في صناعة تنفيذ الطلاء للوصول الى نتائج مبهرة ومرضية. بدأنا عملياتنا في الرياض وتطورت لتصل الى المنطقة الوسطى، المنطقة الشرقية، المنطقة الغربية والمنطقة الشمالية من المملكة العربية السعودية.
